

Custom Module

```
import { NgModule } from '@angular/core';
import { CommonModule } from '@angular/common';
import { FormsModule } from '@angular/forms';

import { HeaderComponent } from '../header/header.component'

import { CarouselComponent } from '../carousel/carousel.component'

import { HomeComponent } from '../home/home.component'

import { RegisterComponent } from '../register/register.component'

import { SignInComponent } from '../sign-in/sign-in.component'

import { AppRoutingModuleModule } from '../app-routing.module';

@NgModule({
  declarations: [
    HeaderComponent,
    CarouselComponent,
    HomeComponent,
    RegisterComponent,
    SignInComponent
  ],
  imports: [
    CommonModule, FormsModule, AppRoutingModuleModule
  ],
  exports: [
    HeaderComponent,
    CarouselComponent,
    HomeComponent,
    RegisterComponent,
    SignInComponent
  ]
})
export class HomeModuleModule { }
```

Import Custom MOdule

```
import { BrowserModule } from '@angular/platform-browser';
import { NgModule } from '@angular/core';
import { FormsModule } from '@angular/forms';
import { AppRoutingModuleModule } from './app-routing.module';

import { AppComponent } from './app.component';
import { HeaderComponent } from '../app/recruiter-components/header/header.component';
import { MainContentComponent } from './recruiter-components/main-content/main-content.component';
import { FooterComponent } from './recruiter-components/footer/footer.component';
import { RecruiterHomeComponent } from './recruiter-components/recruiter-home/recruiter-home.component';

import {HomeModuleModule} from '../app/home-components/home-module/home-module.module'

import { HttpClientModule } from '@angular/common/http';

@NgModule({
  declarations: [
    AppComponent,
    HeaderComponent,
    MainContentComponent,
    FooterComponent,
    RecruiterHomeComponent,
  ],
  imports: [
    BrowserModule,
    AppRoutingModuleModule,
    FormsModule,
    HomeModuleModule,
    HttpClientModule
  ],
  providers: [],
  bootstrap: [AppComponent]
})
export class AppModule { }
```

When you create new components in Angular, in order to use them they must be **accessible** from the current module.

1. is in the same module as the `ProductsListComponent` component or
2. The `AppComponent`'s module imports the module that contains `ProductsListComponent`
